Hands-on with Salesforce CRM, Tableau, SQL, Excel, Snowflake, KPI reporting, and process improvement, with experience translating business needs into accurate, decision-ready reporting.

CORE SKILLS

Analytics: A/B Testing, Experiment Design, Campaign Measurement, Audience Segmentation, Cohort & Funnel Analysis, Retention & Lifecycle Analytics, Opportunity Sizing, KPI Design

Data & BI: Snowflake, Tableau, Replit, Advanced Excel, SQL, Salesforce CRM, and Power Automate

Operations & Governance: Requirements Gathering, Process Documentation, Reporting Governance, QA, Issue Troubleshooting, Self-Service Reporting, Stakeholder Management, Cross-Functional Collaboration, Data Modeling, Data Marts, Data Quality, Validation, Reconciliation

AI & Systems: Claude and OpenAI APIs, deterministic decision engines

Certifications: Google Analytics; IBM Data Analyst | Formerly certified: Salesforce Administrator (201), Advanced Administrator (211)

EXPERIENCE

TransformCo (formerly Sears) | Hayward, CA

Analyst, Business Analytics

Feb 2023 – Present

Scope: marketing analytics, campaign measurement, customer segmentation, data quality, reporting, and executive decision support

- **Supported marketing, loyalty, and retention initiatives** across 46K+ customers through audience segmentation, A/B testing, campaign measurement, and performance analysis; reduced projected campaign liability 45% and improved renewal rate 4.3%.
- **Built and maintained reusable reporting datasets and KPI definitions** across three product lines using Snowflake, SQL, and dbt, supporting consistent campaign, customer, revenue, and operational reporting.
- **Partnered cross-functionally with Marketing, Product, IT, Operations, and Engineering** to translate campaign and business needs into audience criteria, reporting requirements, QA checks, and execution-ready analytics.
- **Improved data hygiene and reporting reliability** through validation, reconciliation, and issue troubleshooting, achieving >95% source alignment and identifying data issues that protected \$700K in potential revenue.
- **Analyzed 50K customer cancellations and recovery behavior** across cohorts, channels, tenure, and re-enrollment, quantifying \$20.9M in revenue loss and \$11.3M recovered to support targeting and retention decisions.
- **Developed recurring performance analyses and forecasts** using customer behavior, channel trends, seasonality, and KPI movement to support planning, leadership reviews, and business decision-making.
- **Documented KPI logic, data definitions, and analytical processes** while reviewing data quality and outputs, troubleshooting reporting issues, and mentoring 4 junior analysts to improve consistency and self-service adoption.

ID Medical | Pune, India

Senior Data Analyst

Apr 2018 – May 2020

Scope: workforce analytics, forecasting, KPI reporting, experimentation, and self-service BI

- **Built demand-forecasting and churn models** that reduced under/overstaffing 28% and employee turnover 19%, turning historical staffing and attrition patterns into targeted planning and retention actions.
- **Analyzed acquisition-funnel behavior and ran controlled sign-up experiments** that increased registration conversion 7%; KPI analysis across time-to-fill and cost-per-hire improved recruiting efficiency 20%.
- **Built SQL/Tableau data marts and LOD reporting** for sales-rep capacity, revenue trends, and conversion metrics, enabling self-service analytics across business units.
- **Partnered with business stakeholders** to translate workforce and recruiting needs into reporting requirements, analytical outputs, and actionable recommendations.

Cognizant | Pune, India

Salesforce Administrator – Reporting & Analytics

Jun 2017 – Apr 2018

Scope: Salesforce CRM & CPQ, reporting, data quality, business requirements, issue resolution, and operational analytics

- **Supported enterprise Salesforce CRM and CPQ (Configure, Price, Quote) reporting workflows**, helping business users access accurate dashboards, reports, and operational insights.
- **Investigated data discrepancies and platform escalations**, coordinating resolution and improving confidence in reporting outputs.
- **Introduced an SLA prioritization framework** that improved operational adherence 30% and strengthened issue-management processes.
